

# COVID-19 Toolkit

## Considerations for restarting your business safely (version 4)

The Better Business for All (BBfA) partnership has used their knowledge and expertise to bring together resources from trusted organisations to help guide you through the main considerations for restarting your business safely.

This Covid-19 Toolkit provides useful documents such as a risk assessment template and action plan, business checklists and useful guides to help you.

In addition to considerations suggested in this Toolkit, please ensure you also keep up to date with current Government guidelines relevant to the control of COVID-19.

This toolkit has been collated from current government guidance by staff across the [BBfA partnership](#). Sources include: [CIEH](#), [Food Innovation Wales](#), [gov.uk](#), [Food Standards Agency](#). The aim is that businesses will find the template checklists, action plan, and documents of practical use when re-opening.

**NOTE: The checklists contain examples of relevant controls based on current guidance. Although these should help give you some direction, you should amend and add controls that are relevant to your specific business having completed your risk assessment.**

## Your first question should be: can I open?

[Check](#) if you are on the list of premises that should remain closed or can open.

Prior to re-opening:

- If you cannot open yet, you should still start considering the risks and controls required to be in place once you are allowed to open.
- Conduct a risk assessment specific to your business and complete the '[COVID secure](#)' poster (if you have 5 or more employees this should be written down. If you have 50 or more employees this should also be published on your website).

[Check](#) what you can and can't do including information on

- Support bubbles
- Vulnerable groups and who is allowed to go to work
- Workers' rights
- How health and safety will be enforced

## Section 6: Suspect Cases of COVID-19

This section explains how employers and businesses can play their part in the NHS test and trace programme to slow the spread of the virus, save lives and help to manage the risk of the virus re-emerging. We will add to this section as more information becomes available. Please note Local Authorities, the Health Safety Executive and Public Health teams will be working together with NHS test and trace in the management of COVID-19 outbreaks and you may be contacted by them to help.

It is vital that employers play their part by:

- making their workplaces as safe as possible
- encouraging workers to follow any notifications to self-isolate and supporting them when in isolation

### Action on suspect cases:

- If there is more than one case of COVID-19 associated with your workplace, you should contact your local PHE health protection team to report the suspected outbreak. [Find your local PHE health protection team](#).

## Keeping Customer/Visitor Records:

- The latest guidance advises that you should keep a temporary record of your customers and visitors for 21 days, in a way that is manageable for your business to assist NHS Test and Trace. Hopefully you are familiar with data protection and how it applies to you. If not further guidance is due to be released on this. As a minimum you should record customers' full names and contact telephone number along with the date and time of their visit.
- In the meantime:
  - Have someone who is responsible for the data being kept
  - Collect only what you have been asked to record. (to be confirmed but is likely to be some basic contact details)
  - Tell your customers you are collecting their details and what you are going to do with it and why. (You will need a Privacy Notice)
  - Keep the information you collect safe. Don't leave it for all to see.
  - Keep it only for the required time. (21 days is the current length of time recommended in the guidance)
  - Delete it securely. (e.g. Shred paper records don't just throw in your bin for someone to find)
  - Don't use the information for anything other than the purpose it was collected. For instance you can't automatically use the information collected for other purposes e.g. marketing
  - Advise customers how they can request access to, or correction or deletion of, their data.
  - Train your staff

## Section 10: Equality, Diversity and Inclusion

The coronavirus pandemic has highlighted a number of issues for different groups. Disabled people, in particular, have been affected by changes to how services are delivered:

- A shift to online ordering but some websites are not accessible and some businesses do not provide alternative methods of ordering for those without internet access (such as telephone).
- Long queues which some disabled people find difficult.
- One-person only admissions disadvantage people who need a carer to attend with them.
- Closure of toilets.
- Changes to layouts which make spaces difficult to navigate, particularly for Blind/Visually Impaired people.

- Face coverings prevent the ability for hearing impaired people to lip read.

A lack of up to date information in Easy Read (simple words and pictures/symbols), British Sign Language and foreign languages has meant that some communities do not know what to do. Easy Read information can help people whose first language is not English.

20% of the population is disabled. Disability covers a wide range of impairments and health conditions including physical and sensory disability, learning disability, neurodiversity (autism, ADHD), mental health conditions and long-term illnesses such as cancer, diabetes or MS. Providing access to disabled people is important not only for the customer, but for businesses too. If your business is not accessible, you are missing out on 20% of UK custom known as 'the Purple Pound'.

The Equality Act 2010 places a duty on service providers to anticipate and make reasonable adjustments for customers and staff. The duty allows you to 'positively discriminate' disabled people – this means you can lawfully 'treat a disabled person more favourably' than someone who does not have a disability. When re-opening your business, some steps you can take to ensure it is accessible include:

- Providing a priority service to disabled customers. This could include fast-tracking in a queue, booking by appointment, providing a 'personal shopper' experience, seating areas.
- Ensuring your website follows accessibility standards.
- Ensuring there are a number of ways that customers can contact you to place an order or ask a question such as email, SMS and telephone.
- Checking any layouts and temporary changes do not block wheelchairs and larger mobility scooters. If you have regular customers who have Guide Dogs, contact the local Guide Dogs group because the dog will probably need re-training to navigate a change of layout. Try to keep changes infrequent.
- Provision of clear face masks or screens so that people who are hard of hearing can lip-read.
- Allowing more than one-person admission if they are accompanied by a carer.
- Being patient with people with autism, dementia or learning disabilities etc. if they are struggling to observe any rules.
- Making sure any 'street furniture' does not cause a hazard or obstruction for wheelchair users, pushchairs and visually impaired people including their Guide Dogs.
- If unsure, consult with local disability organisations.

You will probably have additional considerations to make with regards to staff, bearing in mind that they are also covered by equality legislation to prevent unlawful discrimination (including dismissal because of a characteristic), for example:

- Protection of pregnant employees and maintaining contact with employees on maternity leave.
- Disabled staff and reasonable adjustments in safe working practice.
- Black, Asian and minority ethnic staff: if you employ a number of foreign workers you may have to provide information in foreign languages – for simple information, Easy Read may be sufficient. Black and Asian people are also showing to be disproportionately affected by coronavirus and may want to discuss concerns about their safety at work.
- Older workers may want to discuss the risk of severe ill health from coronavirus which increases with age.

- Staff with caring responsibilities may want to discuss concerns about increased risks for those they care for when they return to work.
